DETAILED ACTION

1. The amendment filed on 3/27/2003 is entered. The rejection of claims 2, 4-24, 26, 28-49 are maintained.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2, 4-24, 26 and 28-49 are rejected under the judicially created doctrine of double patenting over claims 14, 17, 19 and 28 of U. S. Patent No. 6,479,929 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a three dimensional display device comprising the electrical circuitry includes an addressable anode bus line and a cathode line, the phosphorus material emits light of one of a red, green, or blue color (see column 10, lines 14-25).

Art Unit: 2674

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Munz (US 3,555,349) teaches a three-dimensional display device including a cathode ray tube having a plurality of space, parallel light and electron previous display planes (figure 1 and abstract), and Karras (US 4,134,104) teaches a three-dimensional display device including a plurality of transparent plastic sheets arranged in a spaced, parallel array (figure 1 and abstract).
